Journal of Computational and Applied Mathematics 41 (1992) 385–386
North-Holland

Author Index to Volume 41 (1992)

(The issue number is given in front of the page numbers.)

Achuthan, P. and **S. Ponnuswamy,** Padé approximants and Eisenstein–Ramanujan continued fraction (3) 247–264
Anderson, O.D. and **J.G. De Gooijer,** Discriminating between nonstationary and nearly nonstationary time series models: A simulation study (3) 265–280
Andres, J., Asymptotic properties of solutions to quasi-linear differential systems (1–2) 57– 64

Berg, L., The asymptotic expansion of a convolution integral (1–2) 159–161
Bertram, B. and **O. Ruehr,** Product integration for finite-part singular integral equations: numerical asymptotics and convergence acceleration (1–2) 163–173

Choudury, G. and **P. Korman,** On computation of solutions of fully nonlinear elliptic problems (3) 301–311
Cuyt, A., Extension of "A multivariate convergence theorem of the "de Montessus de Ballore" type" to multipoles (3) 323–330

De Gooijer, J.G., see **Anderson, O.D.** (3) 265–280
De Meyer, H., see **Vanden Berghe, G.** (3) 359–372
Diaconis, P. and **R. Graham,** An affine walk on the hypercube (1–2) 215–235

Elbert, Á., Asymptotic behaviour of the analytic solution of the differential equation $y'(t)+y(qt)=0$ as $q \to 1^-$ (1–2) 5– 22

Fazio, R., Numerical length estimation for tubular flow reactors (3) 313–321

Gao, Z. and **L.B. Richmond,** Central and local limit theorems applied to asymptotic enumeration IV: multivariate generating functions (1–2) 177–186
Goh, W.M.Y. and **E. Schmutz,** Preface to the Special Issue on Asymptotic Methods in Analysis and Combinatorics (1–2) 1– 2
Graef, J.R. and **P.W. Spikes,** On the oscillation of an nth-order nonlinear neutral delay differential equation (1–2) 35– 40
Graham, R., see **Diaconis, P.** (1–2) 215–235

Jódar, L., Analytical approximate solutions and error bounds for nonsymmetric Riccati matrix differential equations (*Letter*) (3) 377–383

Kitamura, Y. and **T. Kusano,** Asymptotic analysis of solutions of systems of neutral functional differential equations (1–2) 23– 33
Korman, P., see **Choudury, G.** (3) 301–311
Kulev, G.K., Uniform asymptotic stability in impulsive perturbed systems of differential equations (1–2) 49– 55
Kusano, T., see **Kitamura, Y.** (1–2) 23– 33

Li, H., see **Wong, R.** (1–2) 65– 94
Lin, Q. and **J.G. Rokne,** Circular centered forms for rational functions in several complex variables (3) 347–357
Łuczak, T. and **A. Ruciński,** Convex hulls of dense balanced graphs (1–2) 205–213

Mahmoud, H.M., Distances in random plane-oriented recursive trees (1–2) 237–245
Makrelov, I., On a modification of Chebyshev's method (*Letter*) (3) 373–375
Micchelli, C.A., Banded matrices with banded inverses (3) 281–300

Odlyzko, A.M., Explicit Tauberian estimates for functions with positive coefficients (1–2) 187–197

Palmer, E.M., Matchings in random superpositions of bipartite trees (1–2) 199–204
Paris, R.B., Smoothing of the Stokes phenomenon using Mellin–Barnes integrals (1–2) 117–133
Paris, R.B. and **A.D. Wood,** Exponentially-improved asymptotics for the gamma function (1–2) 135–143
Ponnuswamy, S., see **Achuthan, P.** (3) 247–264

Richmond, L.B., see **Gao, Z.** (1–2) 177–186
Rokne, J.G., see **Lin, Q.** (3) 347–357
Rovder, J., Asymptotic and oscillatory behaviour of solutions of a linear differential equation (1–2) 41– 47
Ruciński, A., see **Łuczak, T.** (1–2) 205–213
Ruehr, O., see **Bertram, B.** (1–2) 163–173
